## Daily Driver Street Truck Challenge Rules

Gas trucks weight max 7000lbs

Diesel trucks weight max 9000lbs

### **Street Truck Class Rules:**

1. All trucks must be able to be licensed as street legal as they present. Mud flaps and current tabs will not be necessary for the class.
2. NO weights of any kind are allowed on or in any street trucks.
3. Tires must be DOT rated, ANY trucks with tires exceeding 37 inches will be required to have driveline loops for safety. If you have any questions, please contact anyone in the pulling committee or email Jeff at [kentchfarms@outlook.com](mailto:kentchfarms@outlook.com)
4. There will be no blocking of suspension allowed.
5. Hitch must be in Factory location with a maximum height of 26 inches.

The PSATMA Pulling Committee would like to thank you for attending. Please note that all trucks are subject to being teched and any not conforming to these rules will not be allowed to pull. If you need help, please feel free to contact any committee members or submit your request to the email address above.  
Happy Pulling!
